Eco Shell – The Art of Sustainable Dining.

PRODUCT CATALOGUE

# About Us

# 关于我们

Eco Shell offers a full line of sustainable cutlery designed to support waste diversion goals while delivering reliable performance. Whether you need compostable, plant-based utensils or recycled content options, our cutlery is designed to meet the needs of any foodservice operation.

Our product portfolio extends beyond disposable serviceware to include hotel and guest amenities, allowing us to act as a true single-source supplier. We supply premium disposable paper cups, plates, and bowls; catering-grade and household aluminum foil; aluminum food containers; and a complete range of wet and dry wipes. In addition, we provide hotel amenities such as guest toiletries, hygiene kits, and in-room care items, developed to meet hospitality and airline service expectations. All products are manufactured using food-grade and skin-safe materials, ensuring safety, comfort, and performance in both guest-facing and operational environments.

Our disposable products, including cups, plates, and food boxes, are designed with both functionality and sustainability in mind. Each item is manufactured using high-quality, food-grade raw materials that are safe for direct contact with food and beverages.

### Raw Materials Used:

- **Paperboard & Cardstock:** Our cups and boxes are primarily made from sustainably sourced paperboard, derived from FSC-certified forests. The paper is thick, durable, and resistant to moisture, making it ideal for both hot and cold beverages.
- **Plant-Based Coatings:** Instead of traditional plastic linings, we use biodegradable PLA (polylactic acid) coatings derived from corn starch or sugarcane. This ensures that the products remain leak-proof while being compostable.
- **Eco-Friendly Inks:** All prints and branding on our products use water-based, non-toxic inks that are safe for food contact and environmentally responsible.
- **Environmental Benefits:**
  - Biodegradable & Compostable:** Our products decompose naturally when disposed of in commercial composting facilities, reducing landfill waste. The plant-based coatings break down in months rather than decades.
- **Sustainably Sourced:** Paper and cardboard come from responsibly managed forests, ensuring minimal impact on deforestation and maintaining ecological balance.
- **Reduced Plastic Usage:** By replacing conventional plastic cups, lids, and containers with renewable materials, we significantly reduce microplastic pollution and carbon footprint.
- **Recyclable Options:** Depending on local waste management facilities, our paper cups and boxes can also be recycled after use, further contributing to a circular economy.
- **Production Process:**
  - Raw Material Preparation:** FSC-certified paperboard is selected and treated with water-based PLA coating for durability.
  - Cutting & Forming:** Sheets are cut and shaped into cups, plates, or boxes using precision machinery that minimizes waste.
  - Printing & Branding:** Eco-friendly inks are applied for logos or designs, ensuring visual appeal without compromising sustainability.
  - Quality Check & Packaging:** Every product is tested for strength, leakage, and durability before being packed for distribution.

# Paper Plates & Trays 纸盘与托盘

Customized design of paper food tray, Elements provides customized multiple specifications, and we have two styles to choose from. One is used for packaging fresh fruit, which is generally used in large supermarkets and chain stores, and the other is used for packaging fast food snack bread, which is used for baking and fast food restaurants. You can provide us with design solutions according to your specific needs. If you have special specifications and the initial order quantity is met, Our door is customized for you.

## Eco-Friendly Material:

Made from certified paperboard, Tray Seal™ reduces plastic use by 85% and is fully recyclable, supporting a circular economy from start to finish.

## Advanced Freshness Protection:

Its molded fiberboard and high-barrier lining create a secure seal that prevents leaks and extends shelf life, matching the performance of traditional plastic trays.

## Easy & Cost-Effective Integration:

Designed for your existing equipment, Tray Seal™ integrates seamlessly into production lines without extra investment, offering a practical sustainable switch for all protein products.

# PAPER CUPS 纸杯

Our engineers have designed many styles of paper cups, including single-layer paper cups, hollow paper cups, corrugated paper cups, embossed paper cups, vending paper cups, etc., supporting the packaging of coffee, hot tea, juice, milk and other drinks. The paper cups produced by our company are environmentally friendly, biodegradable, compostable and recyclable. We strictly control every aspect of the production of paper cups to provide you with the best quality products.

# ALUMINUM PRODUCT

## 铝制品

### HOUSEHOLD ALUMINUM FOILS

Our household aluminum foil is manufactured from high-quality, food-grade aluminum, designed to meet daily cooking, storage, and food protection needs. It offers excellent heat resistance and flexibility, making it suitable for baking, grilling, wrapping, and food preservation.

The foil provides a strong barrier against moisture, light, and odors, helping to maintain food freshness and hygiene. Its durable yet easy-to-handle structure ensures tear resistance while allowing smooth cutting and wrapping.

Available in multiple widths, thicknesses, and roll lengths, our household aluminum foil is suitable for home kitchens as well as hospitality and airline catering preparation areas. Custom packaging and private labeling options are available.

### KEY FEATURES

Food-grade and safe for direct food contact

Heat-resistant and suitable for oven use

Strong, flexible, and tear-resistant

Protects food from moisture and contamination

Available in standard and customized sizes
